

HOW TO EXPORT VIDEO IN ADOBE PREMIERE ELEMENTS

Exporting Video

1. Click the last green tab across the top labeled, *Share*. A menu will appear with five selections: Disc, Online, Personal Computer, Mobile Phones or Players, and Tape.
2. Make a selection based on what you need to do with the end product.

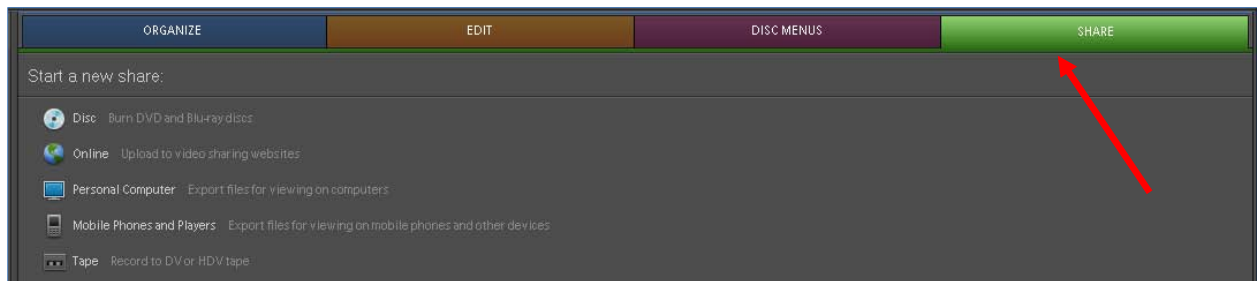

Figure 1. *Share* tab

3. To export a video that WILL play in *Quick Time*, select *Mobile phones and players*.
4. On the first drop down menu, select *iPod and iPhone-High Quality*.
5. Click the advanced button near the center of the workspace.

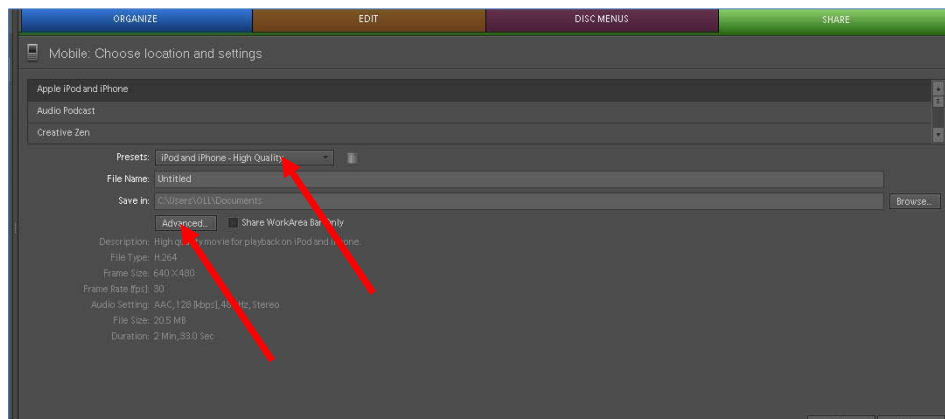

Figure 2. *iPod and iPhone-High Quality* option and *Advanced* button

6. The advanced menu will appear. Set the pixels to 640 width by 480 height.
7. Under the pixel aspect ratio, select the widescreen 16:9.
8. Once the preferences have been set, click *Ok* at the bottom.
