

HOW TO CREATE A PODCAST USING WINDOWS LIVE MOVIE MAKER '11

Updated 11/08/12

Capturing Video

1. You can record a podcast by clicking on **Webcam video** icon.

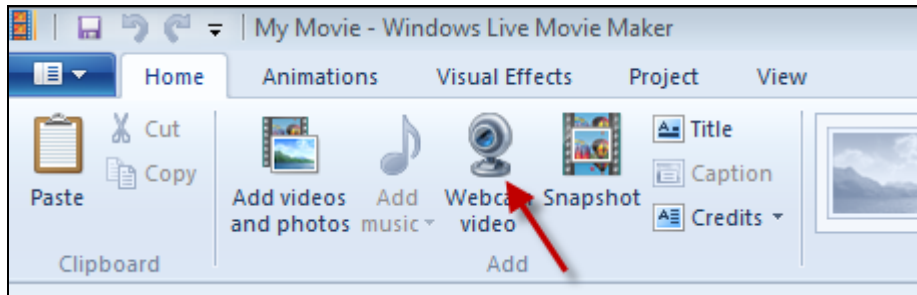

Figure 1. Webcam video icon

2. Your webcam will display the image that is ready for recording

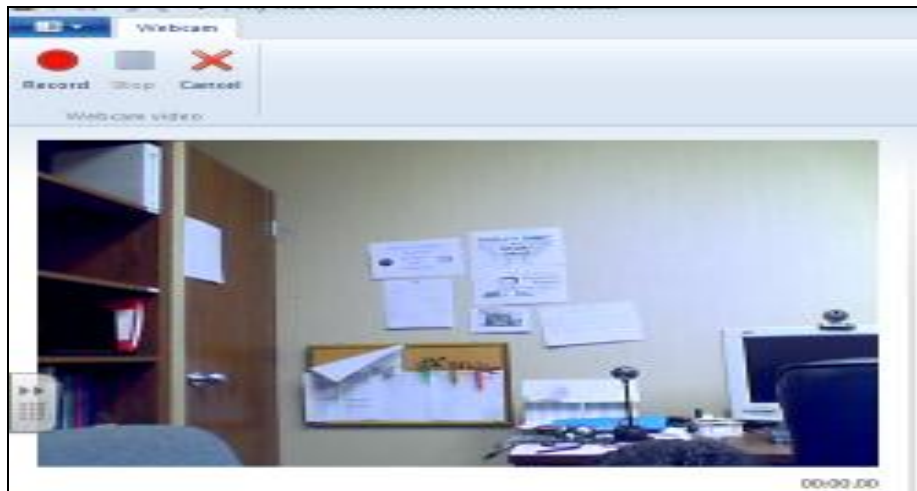

Figure 2. Webcam view

3. Click on the **Record** button to start your recording

Figure 3. Record button

4. Click on the **stop** button once you are done recording.

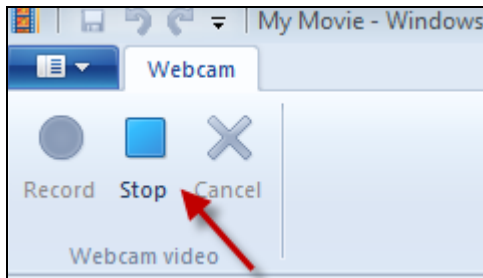

Figure 4. *Stop button*

Saving Video

Once you click on the stop button you will be prompted to save your podcast. Give your podcast a meaningful name and save it in the desired location.

Figure 5. *Saving Video*

Adding videos and photos

1. You can also add videos and photos which are already present on your computer 111

by clicking on **Add videos and photos icon**

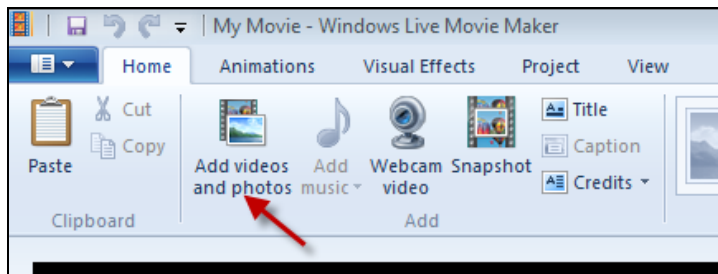

Figure 6. *Add videos and photos icon*

2. Below is photo of a frog which was added next to video captured via webcam

Splitting the Video

1. To split the video, drag the black bar where you want to split the clips

Figure 8. *Splitting clip*

2. Go to the **Edit** tab and click **Split** (Split works only for videos, not photos)

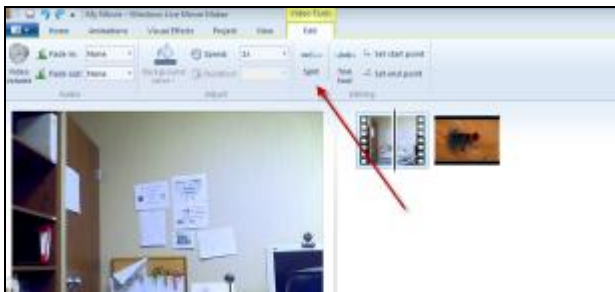

Figure 9: *Split command*

Adding Transitions

1. Select the **Animations** Tab. Hover your mouse over any transition to preview it on your clip.

Figure 10. *Animations Tab*

2. Once you have chosen a transition, click on the beginning of the video clip or photo where you want to add the transition. Then click the desired transition to apply it.

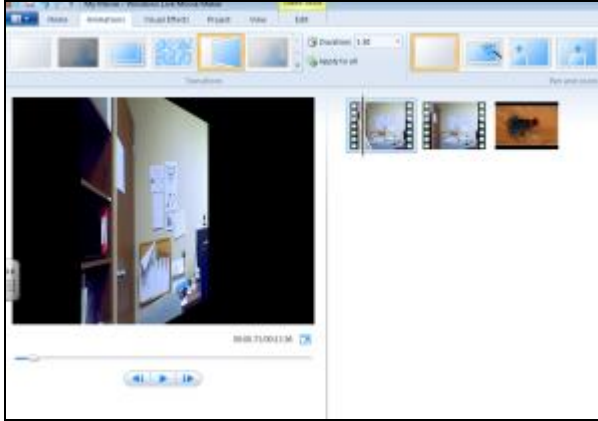

Figure 11. Adding a transition

Adding Captions

1. Click on the photo or clip where you want the caption. Then click on the **Home** tab, and then click **Caption**.

Figure 11. Caption command

2. A text box will appear on the lower part of your image on the video . Click inside the text box and enter your text.

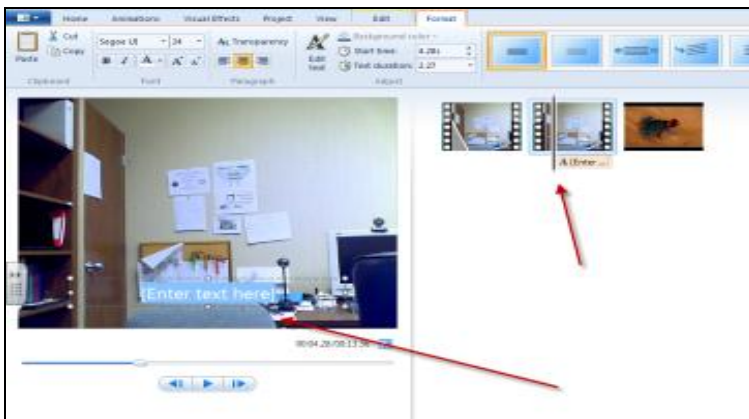

Figure 12. Adding captions

Adding Titles or Credits

1. Click on the Home tab, and then click either **Title** or **Credits**

Figure 13. Add Titles or Credits

2. A black slide will appear. Click inside the text box and enter your text.

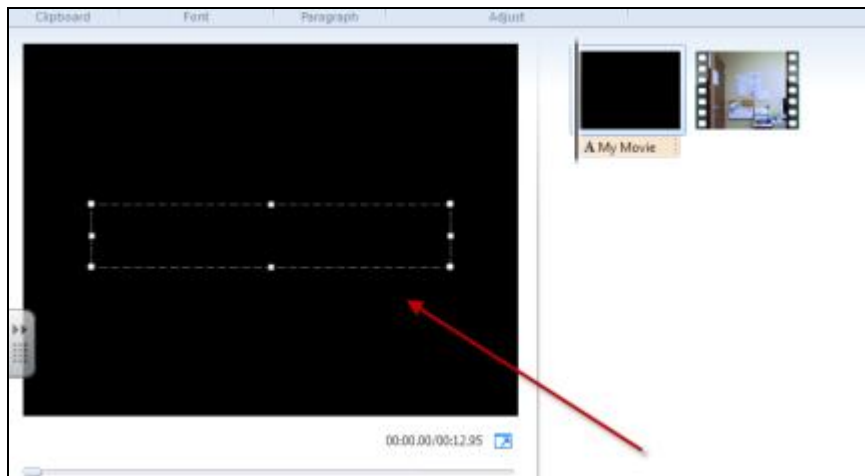

Figure 14. Add Title

3. Note that **title** will default to a **slow zoom** and the **credits** will default to **downward scrolling** through the text. However you can add different motions to the slide with various options in the upper right corner, on the **Format** tab.

Export your movie to a file format that is compatible with Microsoft Powerpoint.

1. Click the main file menu button and then click **Save Movie**
2. Once you are satisfied, copy the finalized **WMV** file over to your external device for uploading to the Web or use in another project, like a PowerPoint presentation.
