This How-to-Guide will explain the process for syncing data from USAonline Sakai and the i>clicker GO App to i>grader. Students using the i>clicker GO App for their smartphone are unable to register their i>clicker number within USAonline Sakai because their i>clicker registrations are sent directly to i>clicker.com. Therefore, you will need to Sync twice in order to capture both the USAonline Sakai roster and students who use i>clicker GO.

Syncing Roster Data from USAonline with i>grader

1. From the i>grader home screen, click Sync. Then click Yes on the Confirm Roster Sync Option window to confirm the sync of Sakai roster information with i>grader data.
2. Enter your USAonline login credentials and click Log In
