

HOW TO ACCESS TECHSMITH RELAY AT USA

Updated 04/07/15

Download TechSmith Relay

In order to use TechSmith Relay, you need to install the software on your computer. Please follow the steps below.

1. Go to <https://camtasia.usouthal.edu/relay>.
2. Use your JagMail username (e.g. joesmith) and JagMail password to sign in.
3. Once you have signed in, select *Download Recorders* on the navigation bar.

4. Select the *Download* link that matches your platform to download the installation file.

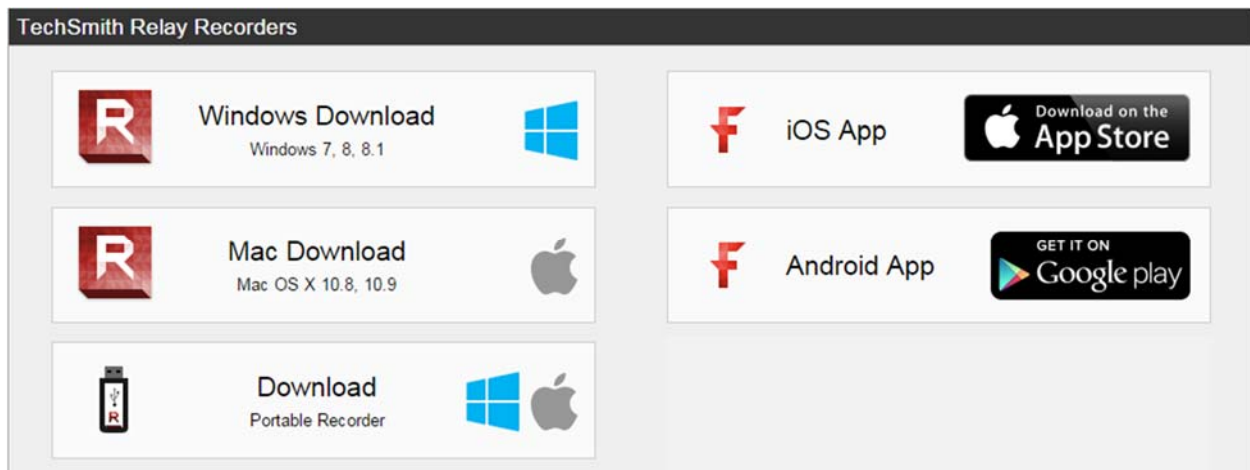

Figure 1. *TechSmith Relay Download Recorders page*

5. Double-click the downloaded installation file and follow the installation instructions.

TechSmith Relay Profiles

The university server will process and publish various types of formats depending on the TechSmith Relay profiles which you have chosen. The complete list of available profiles are described in the following chart:

Profile	Format	Description
Camtasia Studio for Windows	CAMREC	Produces a file for editing with Camtasia Studio for Windows
Camtasia Studio for Mac	CAMREC	Produces a file for editing with Camtasia Studio for Mac.
MP4 Download	MP4	Creates an MP4 file for download.
MP4 with Captions	MP4	Creates an MP4 that can be queued for captioning. Note: You must release the captions before publishing.
MP4 with Smart Player <i>(Recommended for use in most situations)</i>	MP4	Creates MP4 file displayed in Flash plus an HTML5 fallback player if Flash is not available.
