

**BICU guideline:
Gastroparesis &
monitoring of gastric
residuals**
7.30.2020 draft
acb

High risk

- Nausea / Vomiting
- H/O gastroparesis
- longstanding DM
- >20% TBSA
- Inhalation injury

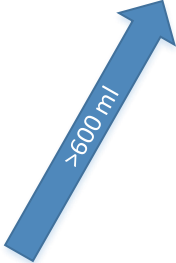

Q6 hour residuals

Low risk = no
residuals

Continue Q6 hour
residuals until deemed
low risk

- Obtain EKG
- Discuss QTc > 480ms
- Consider EES +/- Reglan
- Weekly EKG
- Limit QTc Prolongation*

- * **Common Burn rx which can prolong QTc**
- Typical antipsychotics
 - Atypical antipsychotics
 - SSRIs
 - TCA (amitriptyline)
 - Macrolides (erythromycin, azithro)
 - Fluroquinolones (Cipro, Levo)
