Research!America

National Institutes of Health (NIH)

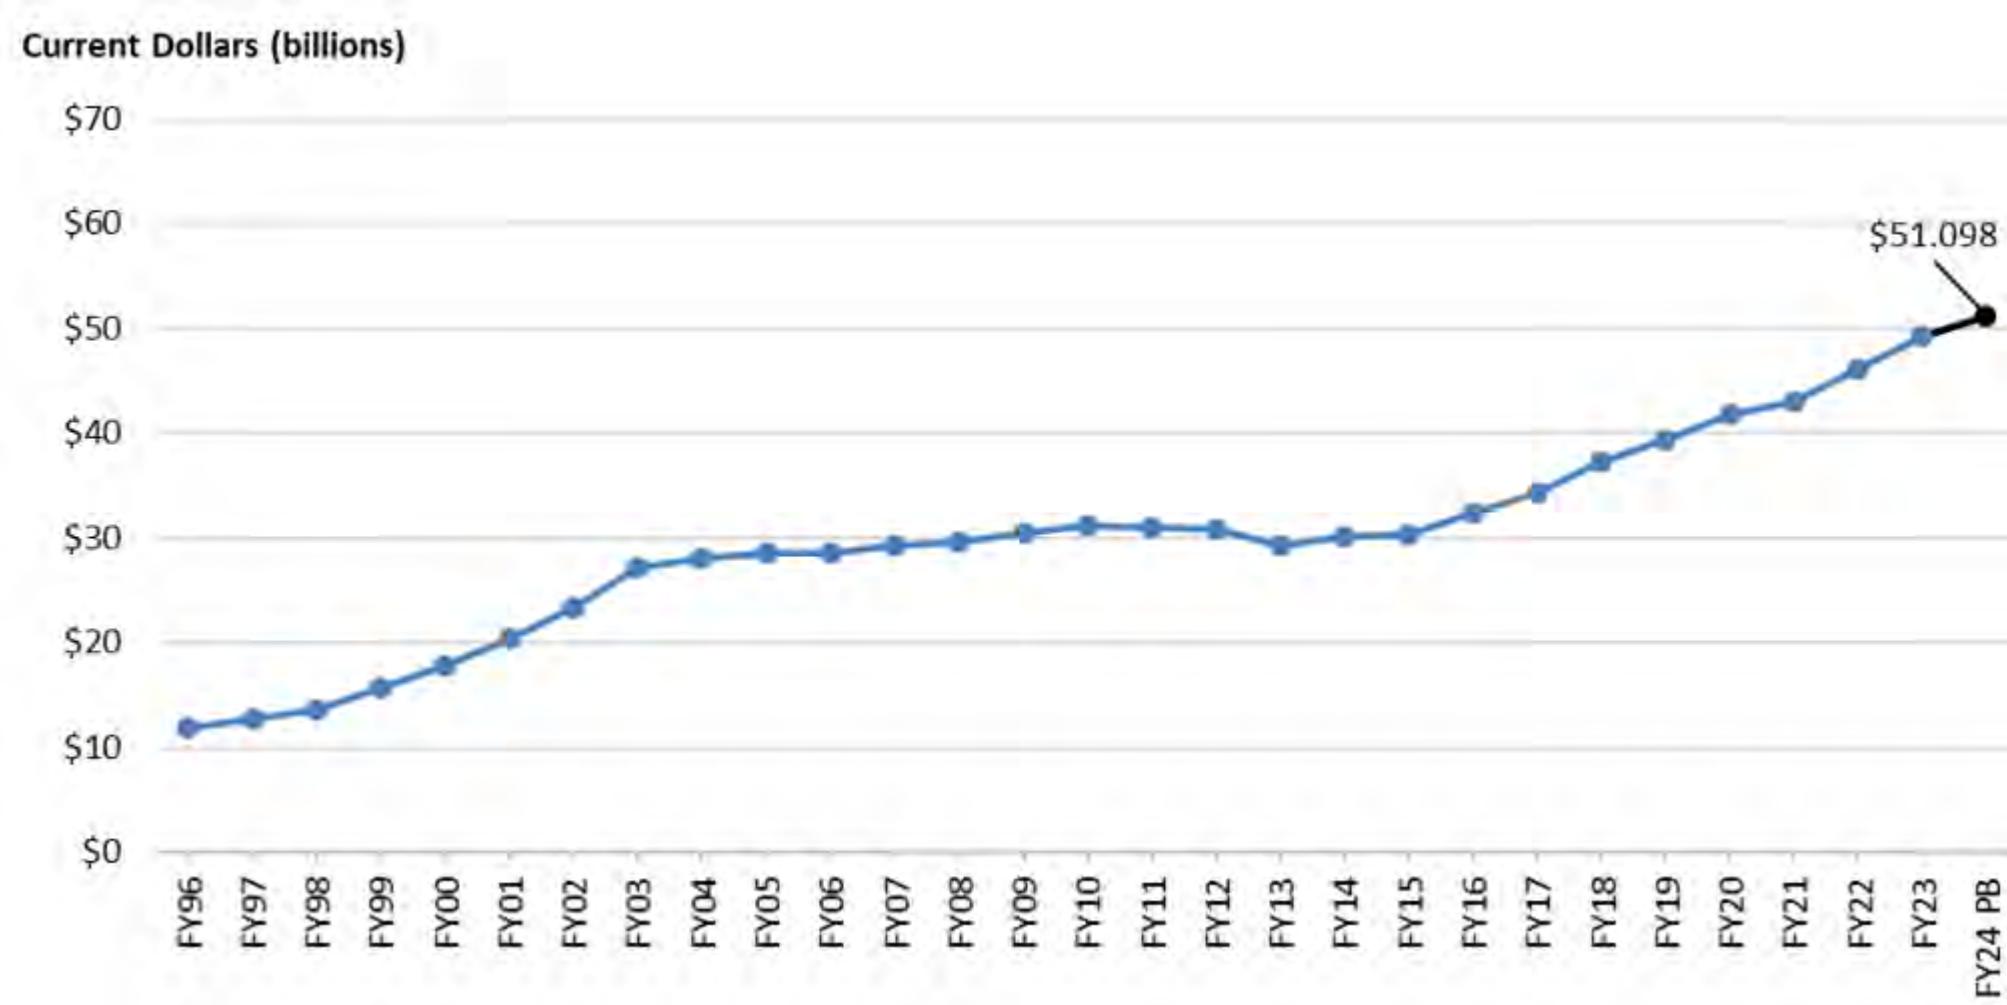

- NIH Building One (1938)
- Dedicated in 1940 by President Franklin Roosevelt
- Now called the James H. Shannon building
- Houses the Office of the Director and other NIH admin offices

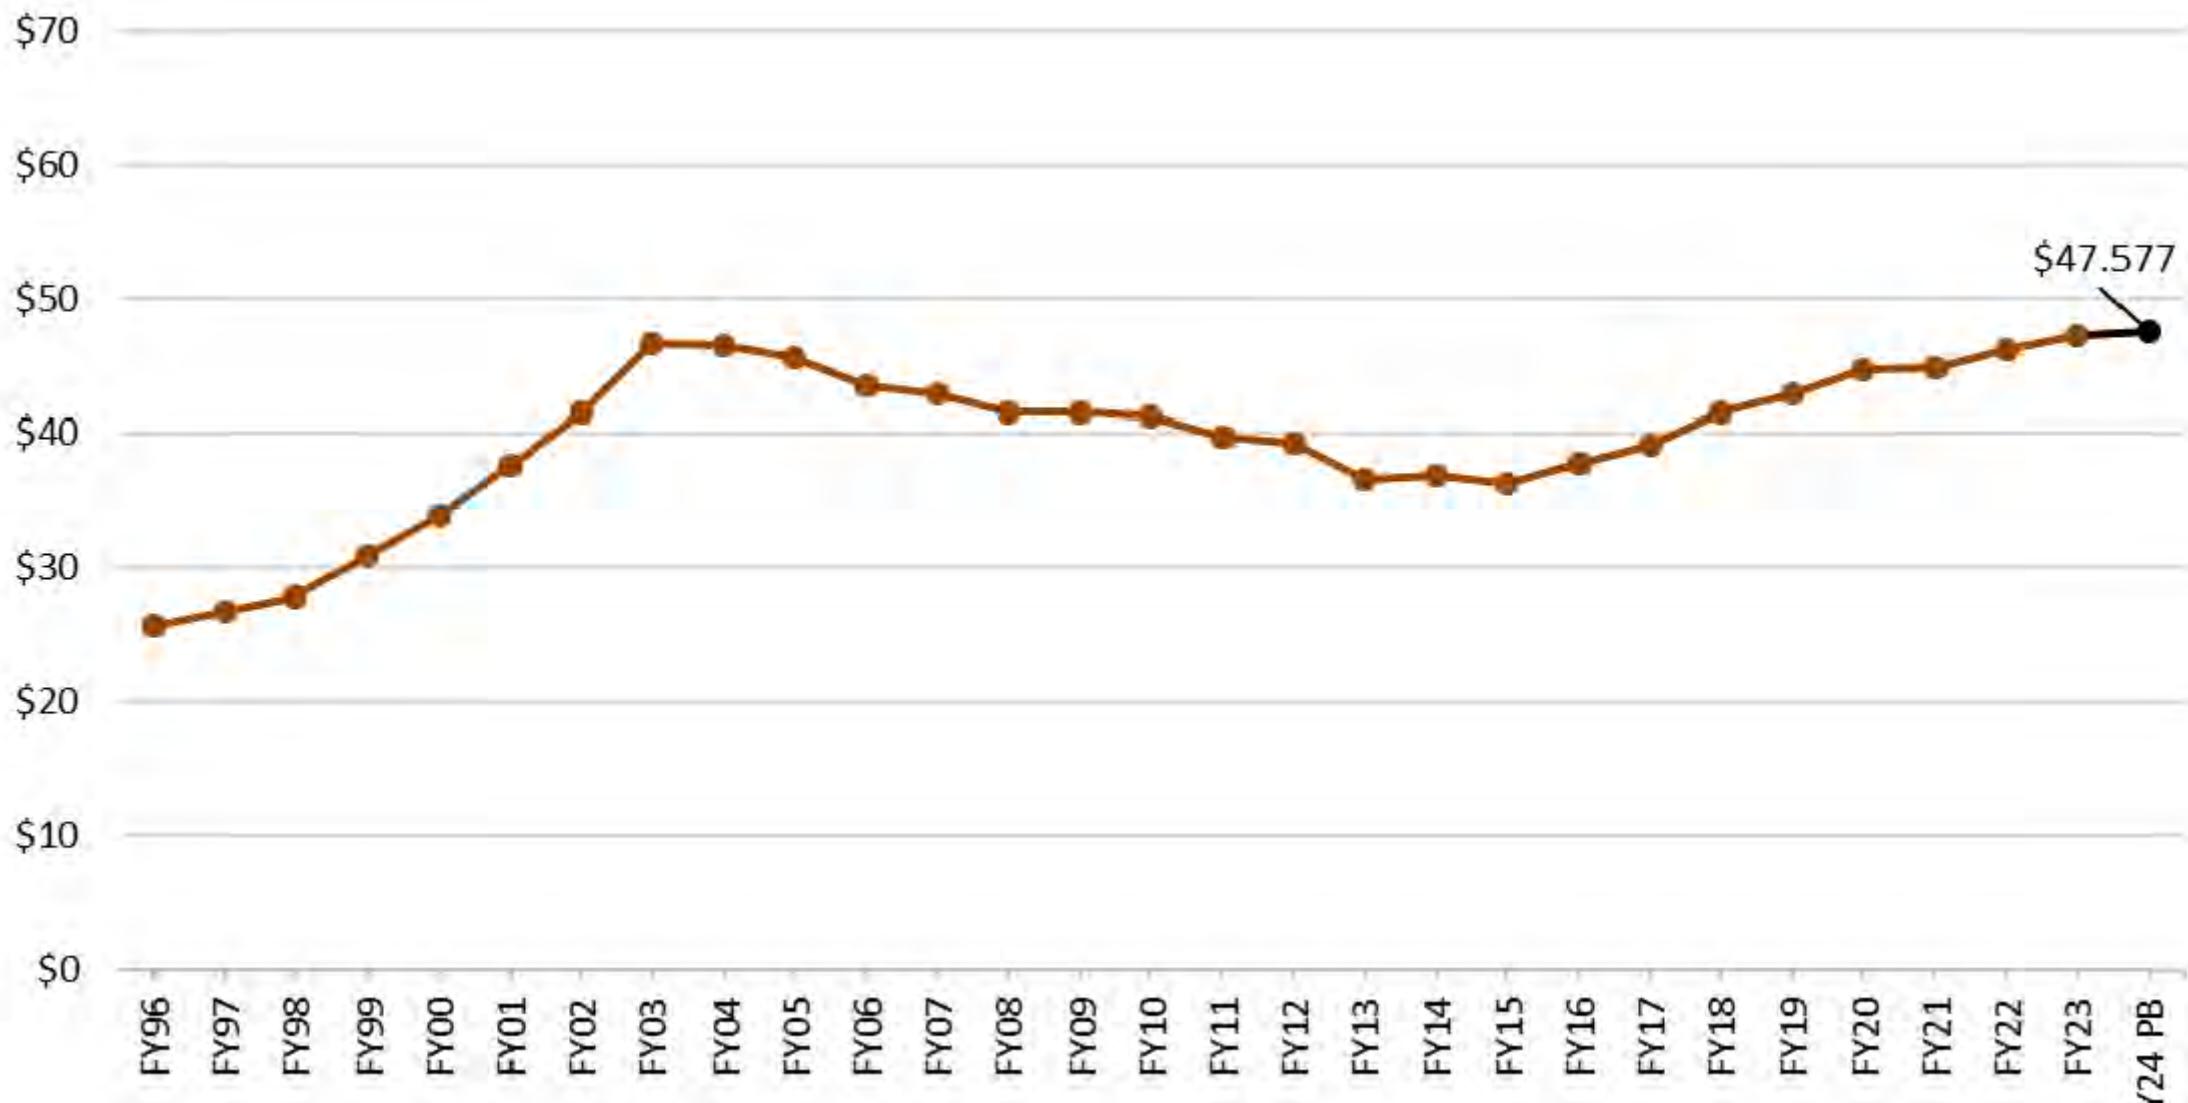

Picture credit- NIH

The NIH accounts for 82% of federal investment in health and medicine research
~\$50 billion per year currently

NIH funding 1996-2023 (\$, billions)

NIH funding 1996-2023 (\$, inflation adjusted billions)

NIH: 27 Institutes & Centers (ICs)

Institutes

- National Cancer Institute (NCI)
- National Eye Institute (NEI)
- National Heart, Lung, and Blood Institute (NHLBI)
- National Human Genome Research Institute (NHGRI)
- National Institute on Aging (NIA)
- National Institute on Alcohol Abuse and Alcoholism (NIAAA)
- National Institute of Allergy and Infectious Diseases (NIAID)
- National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS)
- National Institute of Biomedical Imaging and Bioengineering (NIBIB)
- National Institute of Child Health and Human Development (NICHD)
- National Institute on Deafness and Other Communication Disorders (NIDCD)
- National Institute of Dental and Craniofacial Research (NIDCR)
- National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK)
- National Institute on Drug Abuse (NIDA)
- National Institute of Environmental Health Sciences (NIEHS)
- National Institute of General Medical Sciences (NIGMS)
- National Institute of Mental Health (NIMH)
- National Institute on Minority Health and Health Disparities (NIMHD)
- National Institute of Neurological Disorders and Stroke (NINDS)
- National Institute of Nursing Research (NINR)
- National Library of Medicine (NLM)

Centers

- Fogarty International Center (FIC)
- National Center for Complementary and Integrative Health (NCCIH)
- Office of the Director

NIH paylines (2019)

Institute	Funding Mechanism	Payline/OIS
NIAID	R01 (new PI)	16%
	R01 (non-new PI)	12%
	R03	28 OIS
	R21	28 OIS
NCI	R01 (new PI)	14%
	R01 (non-new PI)	8%
	R03	25 OIS
	R21	7%
NHLBI	R01 (new PI)	26%
	R01 (non-new PI)	16%
	R03/R21	N/A
NIA*	R01 (new PI/ESI)	23/25%
	R01 (non-new PI)	16%
	R03/R21	25%
NIGMS	No payline published per funding policies	
NIDDK⁺	R01 (new PI)	18%
	R01 (non-new PI)	13%
NIEHS	No payline published per funding strategies	
NIDA	No payline published per funding strategy	
NICHD	No payline published per funding strategies	

OIS=Overall Impact Score

NIH grant funding mechanisms

- R Research Project grants**
- P Research Program Project grants**
- T Training programs**
- F Fellowships programs**
- K Research career awards**
- S Research-related programs (e.g. S10)**
- U Cooperative agreements**

R grant awards

- R01 Research Project Grants**
- R21 Exploratory/Developmental Research Grants**
- R03 Small Grant Program**
- R35 Outstanding Investigator Awards**
- R43/R44 Small Business Innovation Research (SBIR) Program**
- R41/R42 Small Business Technology Transfer (STTR) Program**
- R13 Conference and scientific meeting grants**

- [R15 Research enhancement award (AREA/REAP) – open only to eligible institutions]**

R01

- Oldest grant mechanism used by the NIH
- Investigator-initiated or solicited by a *Request for Applications (RFA)*
- Bread and butter award for many investigators
- “supports a discrete, specified, circumscribed project to be performed by the named investigator(s) in an area representing the investigator's specific interest and competencies”
- Preliminary data expected
- 4-5 years
- Up to \$500K directs per year can be requested
- Can be renewed
- Standard NIH deadlines

R21

- Distinct from R01
- Designed to encourage exploratory/developmental research by providing support for the early and conceptual stages of project development - “high risk/high reward”
- Expected to lead to something bigger
- Preliminary data are not required, but can be included if available
- Up to 2 years
- Not renewable
- Total direct for 2 years is \$275K (e.g. \$150K, year 1 and \$125K, year 2)
- Not offered by all NIH institutes (not NCI, NCATS, NHLBI, NIDDK, NIGMS, NINDS, except where part of a specific PA)
- Standard receipt dates are February 16, June 16, and October 16.

Not easier to get than R01s

R03

- Small-scale funding for projects with limited scope:
 - Pilot or feasibility studies
 - Secondary analysis of existing data
 - Small, self-contained projects
 - Development of new research methodology or tools
- Preliminary data not required
- Total directs are \$50K/year
- Not renewable
- Not offered by all NIH institutes (not NCATS, NCCAM, NCI, NEI, NHLBI, NIAMS, NIDCD, NIDCR, NIDDK, NIGMS, NINR or NLM, except where part of a specific PA)
- Same deadline as R21s

Not easier to get than R01s

R35

- Provides longer-term support to outstanding investigators
- Flexible funding, not tied to specific aims
- Idea is to free up time for research rather than writing applications
- ICs have their own mechanisms
- 5-year awards (NIGMS), 7 years (NCI), up to 8 years (NINDS)
- May have to relinquish other funding, if awarded
- Budgets vary by IC, e.g. \$250K directs for new investigators (NIGMS), \$600K directs (NCI)

Big awards

P01 (aka PPG)

- Multiple complementary individual projects
- In essence, several R01-level projects in one package – sharing knowledge and common resources
- Often multidisciplinary
- Provides support for cores, including administrative core
- >\$500K (depending on IC)

U01

- Similar to P01 but NIH staff are programmatically involved

P30

- Center core grants

K99/R00: Pathway to Independence Award

- Assists transition from mentored postdoc to independent faculty investigators
- Offered by most ICs
- Must have <4 years postdoc experience at time of submission
- Must be US citizen or permanent resident
- Mentored K99 phase is 2 years
- R00 phase is up to 3 years – granted upon satisfactory progress in K99 phase and on obtaining faculty position
- Must commit minimum 75% time to research (50% for surgical specialties)
- Need mentor and advisory committee
- Max. \$100K/year for K99 phase
- Max. \$250K/year directs for R00 phase
- Have to submit a transition application for R00 phase

Not just about the science – must have meaningful plan for mentored career development

Other K's

K08 Mentored Clinical Scientist Research Career Development award

- Targeted to junior clinicians wishing to engage in research
- Provides support and protected time for an intensive, supervised research career development experience in the fields of biomedical, behavioral, or clinical research, including translational research
- 3-5 year awards
- \$100K/year for salary plus \$25K research support
- Must be US citizen or permanent resident
- Must commit at least 75% time

K01 Mentored Research Scientist Research Career Development award

- Essentially same as K08 but not restricted to clinical investigators
- Used by some ICs to enhance workforce diversity

K02 Independent Research Scientist Research Development award

- For early-to-mid career scientists with research who need additional protected time to increase potential

Training Grants and Fellowship awards

T32 Institutional Research Training Grant

- Provides stipends and tuition for graduate students or postdocs within a training program
- Renewable, 5-year awards
- Supports only US citizens or permanent residents
- Typically led by established, recognized scientist (Professor level)

F awards: Ruth L. Kirschstein National Research Service Awards (NRASAs)

Individual awards to students and scientists at various stages of career

F30 - MD/PhD dual degree trainees (6 years)

F31 – Predoctoral training fellowship (i.e. PhD-seeking graduate students)(3 years
– varies by IC, though)

F31 Diversity - (5 years)

F32 – Postdoctoral fellowship (3 years)

F33 – Senior fellows (changing direction of research careers)

S10 Shared Instrumentation awards

- **Supports purchase of major instrumentation that serves multiple groups**
- **Examples:** X-ray diffractometers, mass spectrometers, nuclear magnetic resonance (NMR) spectrometers, DNA and protein sequencers, biosensors, electron and light microscopes, cell sorters, and biomedical imagers.
- **Two flavours:**
 - **Shared instrumentation award (SIG)** - \$50,000 - \$600,000 range
 - **High-end instrumentation (HEI)** - >\$600,000
- **Minimum of 3 NIH-funded investigators as Major Users**
- **Plus ~4-8 minor users**
- **75% of the AUT should be supported by existing NIH awards**
- **Institutional Commitment is an important factor**
- **Operational plan also important**
- **One deadline per year – June 1st**

National Science Foundation

- FY22 budget was \$8.8 billion, included \$7.0 billion for research

NSF Directorates

- Biological Sciences (BIO) - \$831 million
- Computer and Information Science and Engineering (CISE)
- Engineering (ENG) - \$775 million
- Geosciences (GEO)
integrative Activities (OIA)
- International Science and Engineering (OISE)
- Mathematics and Physical Sciences
- Social, Behavioral and Economic Sciences (SBE) - \$286 million
- STEM Education (EDU)
- Technology, Innovation and Partnerships (TIP)

<https://new.nsf.gov/about/budget/fy2023/appropriations>

National
Science
Foundation

Biological Sciences Directorate

- **Biological Infrastructure (DBI)**
- **Environmental Biology (DEB)**
- **Emerging Frontiers (EF)**
- **Integrative Organismal Systems (IOS)**
- **Molecular and Cellular Biosciences (MCB)**

“NSF does not fund research for which the goals are directly human disease- or health-related, including the etiology, diagnosis, and/or treatment of disease or disorder is not eligible for support”.

The NSF is very big on **broader impacts** of the research in addition to Intellectual Merit, i.e., societal or educational benefit (including URMs)

Opportunities for Early-Career Researchers

- Building Research Capacity of New Faculty in Biology (BRC-BIO)
- Faculty Early Career Development Program (CAREER)
- Career-Life Balance Supplemental Funding Requests
- Computer and Information Science and Engineering Research Initiation Initiative (CRII)
- EArly-Concept Grants for Exploratory Research (EAGER)
- Building Capacity in STEM Education Research (ECR: BCSER)
- Engineering Research Initiation (ERI)
- Launching Early-Career Academic Pathways in the Mathematical and Physical Sciences (LEAPS-MPS)
- RII Track-4: EPSCoR Research Fellows

EPSCoR (Established Program to Stimulate Competitive Research)

EPSCoR Jurisdictions

The National Science Foundation's Experimental Program to Stimulate Competitive Research (EPSCoR) is designed to increase engagement in science and engineering research in historically underfunded regions. In the past year, UAB researchers have received four major EPSCoR grants.

A map of the United States and its territories, with states and territories highlighted in green. The green-shaded areas include: CA, NV, ID, MT, ND, SD, NE, WY, UT, CO, AZ, NM, TX, OK, AR, LA, MS, AL, GA, SC, ME, VT, NH, MA, RI, CT, NJ, DE, MD, DC, and GUAM. There are also inset maps for ALASKA, HAWAII, GUAM, U.S. VIRGIN ISLANDS, and PUERTO RICO.

- Intended to enhance the research competitiveness of targeting jurisdictions by strengthening STEM capacity and capability.
- Offered by NSF, DOE, Dept. of Agriculture and NASA
- Similar in principle to the NIH's IDeA (Institutional Development Award)
- EPSCoR Research Infrastructure Improvement Program (RII) - several tracks:
 - Track-1 – Statewide awards. Up to \$4M/year for 5 years. One per EPSCoR jurisdiction
 - Track-2 – Focused EPSCoR Collaborations (FEC). Up to \$1M/year for collabs between 2 jurisdictions or 1.5M/year for 3 or more collabs.
 - Track-3 – To broaden participation in research. Up to \$750K/year for up to 5 years
 - Track-4 – Research Fellowships – individual faculty

National
Science
Foundation

Major Research Instrumentation Program

- Supports purchase of major multi-user instrumentation or development of new instrumentation
- \$75M available for ~100 awards per year
- More tracks!
 - Track 1: \$100,000 - \$1,400,000 (*2 per institution*)
 - Track 2: \$1.4 – 4M (*1 per institution*)
 - Track 3: \$100,000 - \$1,400,000 to reduce consumption of helium (*1 per institution*)
- Cost-sharing requirement waived for 5 years

Department of Defense (DOD)

- The DOD awards funds from Congressionally Directed Medical Research Programs (CDMRP) for projects that focus on advancements in military medicine and public health benefits
- DOD comprises 4.7% of federal investment in medical and health R&D (2018)
- FY21, DOD's Defense Health Program was \$2.4 billion – \$1.5 billion for CDMRP
- CDMRP appropriation is separate from DOD budget
- Emphasis on high risk, high impact projects
- 1,190 research awards in FY21
- Since 2012, DOD has coordinated with the NIH and the VA to avoid duplication

423 awards have

DOD application process

- Program Announcement/Broad Agency Announcement (PA/BAA)
- Submit pre-application (LOI or pre-proposal) in Electronic Biomedical Research Application Portal (eBRAP)
- If pre-application was a pre-proposal, you must be invited before sending full proposal

Two-Tier Review Process

Overall Score Range

1.0–1.5	Outstanding
1.6–2.0	Excellent
2.1–2.5	Good
2.6–3.5	Fair
3.6–5.0	Deficient

Foundations

*Only < 3% of all US funding for R&D but can be impactful
e.g. support for rare diseases, high-risk science*

- **American Cancer Society** – Currently, \$446 million support for 684 active grants (\$8.2 million to Alabama, none to USA) – 4-year awards, \$200-800K range
- **American Heart Association** - Currently, \$479 million support for 1,700 projects (Reese Stevens & Grant Daly; Undergraduate Summer Research, Tom Rich; Career Dev, Ji-Young Lee)
- **Bill & Melinda Gates Foundation** – enhance healthcare and reduce extreme poverty across the world, and to expand educational opportunities and access to information technology in the U.S (\$67B endowment as of 2022; \$7B in grants)
- **Robert Wood Johnson Foundation** – health equity (~\$50K-2M awards)
- **Cystic Fibrosis Foundation**
- **W.K. Kellogg Foundation** - children
- **Howard Hughes Medical Institute** (invests in researchers, inc. Gilliam Fellows)
- **Breast Cancer Foundation of Alabama** - \$1.3 million for 24 projects in 2022. Current USA awardees are Drs. Chakroborty, del Pozo-Yauner and Singh (Seema)
- **Lions Club** – e.g. vision research

Mission Statement

We partner with faculty and staff of the Colleges of Medicine, Nursing, Allied Health along with USA Health and the Mitchell Cancer Institute to provide our expertise during the research administration lifecycle of external and internal sponsored activities.

Vision Statement

To be ambassadors focusing and leveraging our knowledge to enhance the university community by upholding standards of excellence.
