Good afternoon Robert,

Attached below is the equipment matrix and current promo flyer. Not listed on the flyer is that the iPhone 14 is currently free on the NASPO contract, which you are on.

When a device comes in that is an upgrade (anything: phone, MiFi, etc.) you would activate it by calling 877-807-4646 from another phone and following the prompts. It will ask for the phone number you are activating.

For new lines, the device comes pre-activated. It only needs to be powered on.

If you have any other questions, let me know!

Thank you,
Keith Dardis
