

Invention or Idea?

Kick-Off Meeting

If <u>INVENTION</u> (i.e. reduced to practice) proceed to Commercialization Roadmap.

If <u>IDEA ONLY</u>...are there clearly defined plans for development?

"Go" or "No go"

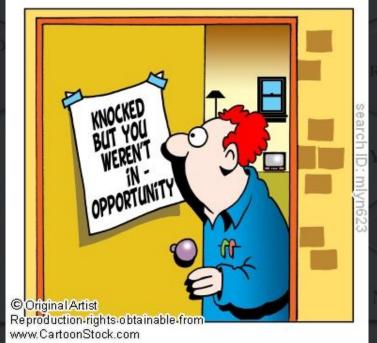

INVENTION DISCLOSURE

MARKETING AND LICENSING

Existing Corporation -- University Spin-off

{Field of Use, Geographic Region, Up-Front Fees, Milestone Payments, Additional Research, Royalties}

Always Market Focused!

DUE DILIGENCE REVIEW

External Considerations

Commercial Assessment Patent Assessment Technical Assessment Regulatory Requirements Funding Needs/Availability

Internal Considerations

Inventorship Champion/Inventor Participation Prior Governing Agreements Pending Disclosures

Technology

- Technical Merit
- Stage of Development
- Scalable Feasibility
- FDA Approval?
- Market
 - Fit
 - Space concentration
 - Participants & segregation
 - Drivers & restraints
 - Growth trends

Intellectual Property

Prior Art & Patent Landscape

Commercial Path

- Start-up
- Partnership
- Sponsored Research
- Larger Established
 Company

Technology "passes" the rigorous vetting process. Great! Now what?

PATENT PROTECTION

Whether startup or approaching existing industry, what is needed to de-risk the technology?

I.P. protection and R&D

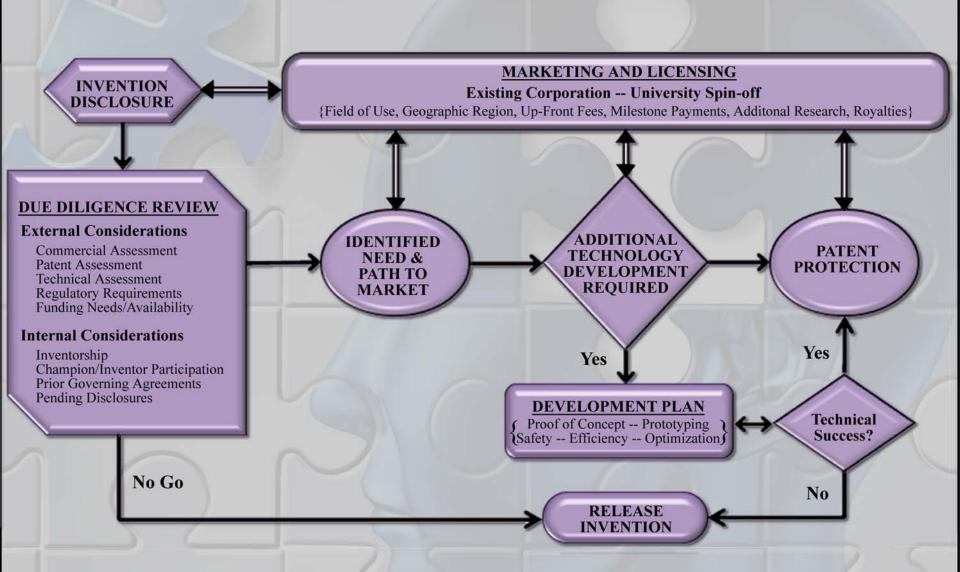

Cycle of Design, Implement, Test, Adapt until asset is sufficiently refined, validated and protected.

MARKETING AND LICENSING **Existing Corporation -- University Spin-off** {Field of Use, Geographic Region, Up-Front Fees, Milestone Payments, Additional Research, Royalties} **ADDITIONAL** IDENTIFIED **PATENT** TECHNOLOGY NEED & PROTECTION DEVELOPMEN' PATH TO REQUIRED MARKET Yes Yes **DEVELOPMENT PLAN Technical** Proof of Concept -- Prototyping Success? Safety -- Efficiency -- Optimization No RELEASE INVENTION

R&D and possibly production and sales until asset has been de-risk to satisfy exit strategy or licensing objectives.
